

UNDERSTANDING ZOOM

What is Zoom?

Zoom is an online video communication platform that allows multiple people to join a video meeting to connect and communicate remotely. Zoom is a super simple way for people to come together from the convenience of their own home! It also allows individuals to meet from different cities, states, even countries! Zoom is an amazing online platform!

Will I need to purchase anything to operate zoom on my own devices?

No. You will not need to purchase anything. If you would like to join Zoom, you can sign up for a free account today! However, an account with zoom is not necessary to join an online group.

Do I need to download an app on my computer or smart phone?

No. One of the most convenient things about zoom, is that you can access zoom without even having an account or the app on your phone.

How do I join an online group through zoom after I sign up on the TC website or app?

Great question! When we receive your form to join one of our online groups, our Next Steps Director, Taylor Brookshire, will send you an invitation to that specific online group you signed up for. In that email will be a link to join the group. All you must do to access the group is click the link at the time of the group and it will automatically bring you into the online group!

What if I don't know how to operate Zoom?

Don't worry if you're not familiar with the Zoom platform. It is VERY simple and easy to navigate. Each group you join, the host will spend a couple minutes giving some quick guidelines for best practices while using zoom!
